Style: Ink Verified Purchase. I have bought four 4 hp ink cartridges in the past 6 months. I'm lucky to get 40 pages out of a black ink 63 cartridge. NOT the recommended pages. And maybe 30 pages of color ink instead of the they claim. And you can only put HP ink cartridges in the printer or you will get an error. It's cheaper to print at the local library. HP should do better quality control if you read other reviews it sounds like these cartridges are being sold half empty. NOT OK for the price we pay. Ordered the 2 pack 1 tri-color, 1 black cartridge. Item arrived quickly so that's good! However, the box was taped shut, indicating it had been previously opened Double checked to see if I missed anything in the description, I still see nothing about reused cartridges being the items for sale. Description says the black cartridge will yield " pages in black. Will not be ordering again. Images in this review. This is a great deal. As you can buy them from other retailers for 2x the price. My issue is with the black ink cartridge which is supposed to be full as I have only used it a few times but it is indeed almost completely empty. I bought them together yet one is almost gone? Seems fishy. Buyer beware. HP really does back its products. The black worked fine. I put the color in, and the machine would not read it. We turned the printer on and off, and installed and reinstalled it multiple times before finally giving up. We happened to have another color cartridge on hand, and put it in. It worked immediately. I pay extra for genuine HP parts so that we don't have this problem. Most companies today don't seem to care about anything. I have changed my "star" rating to the top. Will not buy again. Do not recommend. The ink ran out so fast. I had originally used the 63xl for black and tri color and it lasted so long. I printed out over color and black and white photos and still had ink left. Very disappointed about this purchase. Thought it would last as long. Will never buy this again. They were The ink lasted only a few documents. They were just plain reports without excessive graphics or images. A

complete dud. I purchased this in August to have on hand when I ran out of ink. I ran out of ink, installed the cartridges and the black ink is defective. The tri-color seems to be fine. Being that it is out of Amazon's return stage, I am in a quandary as to what to do. I have paid for a product that I am not able to use. Any suggestions? So not only was a I sent a defective cartridge but it was not full either. I have downgraded my 2 stars to 1 star based on this new information. I bought this for my work and I am in accounting and print over 20 pages a day. Once I installed the ink in my printer an ad popped up. I clicked the button not interested, but every time I printed something, the ad will pop up. That got annoying really quick, but I kept working and trying my best to ignore it. Then today, I had enough. The ad kept popping up even when I was not printing anything and would do it every 20 seconds. I went into my programs to see if something was downloaded and could not find anything that would relate to the HP ad. So I took the ink out of my printer and the ad's have gone away! My computer was getting slow like it had a virus and now it is quick again. I would not recommend buying this ink, it seemed like there was something downloaded into the ink cartridges to cause the ad pop ups and slow your computer down. I normally go to Office Depot to buy my ink and will continue to do so, I don't trust buying ink now on here. Hopes this helps because I did not see anyone mention the ad's, but like the other reviewers, the ink is really low as well. I had this for less than a week and I have thrown it away before its full use. See all reviews. Top reviews from other countries. I ordered this cartridge 6 months ago, I hardly ever print. I have printed nothing that uses intensive amounts of ink like photos. In total I printed a 25 page regular script document and about a dozen short emails. THe ink level after this is showing near empty. HP claims this cartridge wil print regular pages. I will never order online form this source again as I am sure I got a cartridge that did not contain anywhere near the amount of ink it claims to have. Ink is always the expensive thing. Great opportunity to buy when it's on sale through Amazon. Always get the 'extended range' ink. Actually I kept getting an error message. There is very small quantity of Ink in the Cartridges. I do not recommend this HP Product. Half the size of normal HP cartridges. The ink was easy to install and I was able to get it working no problems. Unfortunately after only 33 pages of printing, in black and white, the black ink cartridge ran out entirely. I have submitted a refund request.. Report abuse. Style: Ink Verified Purchase. HP cartridges have little ink at a big price. Non-HP refills last longer and are cheaper. Better yet, fill your own with the ink fills available on Amazon. They are easy to fill and very cheap. The ink print scam is getting old and learn to refill I just opened both packages and when I inserted each ink cartridge the pop up on my screen advise me this cartridge is used or counterfeit. By lovelyww on August 15, Images in this review. I tried the cheaper alternatives and it eventually made my printer quit. So I stay with the original. Never fails. It's just as described. I only order HP ink because I have had bad results with off brand names. I think it's worth it to use the ink recommended. I don't print much but when I do, I need and want a clear copy. HP ink ensures I receive a good copy. I just replaced this cartridge on January 7th I barely got 90 pages out of this cartridge. I used the fast draft option on the printer. Very little graphics and mostly text, double spaced. Wondering if these cartridges aren't full when we get them? Not happy. From to I was using a high end office jet Pro Printer. Ink for that was incredibly expensive. And it required you to have both color and black installed for it to print a page. I started for use generic ink for it. Print quality was a lot worse and it made my printer break. I got the HP printer about a year ago. I use only black ink for it. And for what this is it's not too bad. Especially if you only use your printer occasionally. The print quality seems solid too. It doesn't come out blurry at all. Case in point: Sure, you can buy the generic ink. But it will cost you in print quality and potentially your printer. Is it pricey for what it is? Worth it to buy genuine over generic? Yes to that too. Love that I can now print. I thought there was something wrong with my new printer. I have only used it a few times and I suspect the ink just dried out that came with the printer. The quality of the ink is great, but amount in each cartridge is not enough to do much of anything! When I had a Canon many times-I could always cound on getting alot of papers and pictures printed with one cartridge but the havd the cartridges on these HP 63 barely any ink in them. The cartridges are too expensive to go through them this fast. One thing i cant stand is every time you change a cartridge it automatically wastes alot of black and color print just by printing out test sheets! Im changing to the extralarge cartrdges but they are sooo much more expensive. HP is a good name in computers, but its either the printer or the ink set-up thats ripping us off. The print is good, like i said, just not for the value. See all reviews. Top reviews from other countries. Laura Brown. At best I can say these are easy to install. I hate buying printer ink because it only lasts me for one use. Next time I need to print something I have to buy another ink pack. They say it lasts longer if you use it more often. But, that is impractical and senseless. No thanks. I bought one which promised it would last longer. It cost more, it did not last longer. Until they find a better way I'm not buying printer ink and not using my printer. I can pay a dollar to print a few pages at the local Shoppers Drug Mart. Far more cost effective and less non-recyclable plastic in the landfill. I include the printer itself in that. It's like any other printer ink. Overall, all printer ink is overpriced by so much it's absurd. Nothing special here, and the print quality only stays good for a bit of time. You can tell when the ink is at even just half because the quality starts to go down already. Would not buy if I didn't have to. But I have a cheap HP Printer that needs this. At least it's cheaper than at brick and mortar stores! We recently bought this cartridge as a

replacement. We're happy with it. Today was the first time I used the cartridge and at the second paper printed, printer warned me for an issue in the cartridge. Removed it couple of times and reconnected it as printer recommended and nothing changes. Cartridge is damaged. One paper printed. That's it. I purchased this ink a couple months ago. Finally went to replace my old cartridge with it today to realize that the box wasn't just damaged but already opened. The package inside was also open. Tried to put the ink in the printer anyway but there is no ink. I am disgusted that I received product like this. More to consider from our brands. Pages with related products.
